A5. MESSAGE TELECOMMUNICATIONS SERVICE

A5.1 Application

This tariff applies to Message Telecommunications Service (MTS) furnished or made available by the Company and its connecting companies between points within the state of Kentucky where the respective rate centers of such points also are located in said state.

A5.2 General

Message Telecommunications Service is that of furnishing facilities for communications between stations in different rate centers for either two-point or conference service.

Rates for service between points are based on airline mileage between rate centers. In general, each point is designated as a rate center except that certain small towns or communities are assigned adjacent rate centers with which they are closely associated for communication purposes or by community of interest. Airline mileages between rate centers are determined as provided in A5.5 following.

Terminal equipment or communications system may be used with facilities furnished to the customer by the Company for MTS as specified in Section A3. preceding.

MTS is provided for use by the customer and may be used by others when so authorized by the customer. Use of the service is subject to regulations in Section A2, with the exception of Sections A2.2.1A. and A2.2.1B., which restrict the use of service and prohibit payment to the Customer by another for use of the service, and which remain applicable to Rates for Hearing and Speech Impaired Customers as described in Section A5.3.1F. following.

A5.3 Two-Point Service

A5.3.1 Service Between Telephones

A. Classes of Service

For the purposes of rate application, one of six classes of service may apply. These classes of service are Dial Station, Customer Dialed Calling Card Station, Operator Dialed Calling Card Station, Operator Station, Person-to-Person, and Real Time Rated. Each class of service and its specific regulations follow, ^{PUBLIC SERVICE COMMISSION} ~~as used in the following definitions, means of Kentucky a live~~ Company Operator or the automated operator system. ^{EFFECTIVE}

2. Customer Dialed Calling Card Station (Cont'd)

e. Each of the above types of calls is further classified based upon the type of calling card that is used for billing purposes, as follows:

- (1) AT&T CIID/891 Card - An AT&T Calling Card which contains a billing number issued to AT&T in the Card Issuer Identifier (CIID) or "891" international format or "personal choice" format.

The CIID card number consists of a 10 digit account number and 4 digit personal identification number (PIN). The 10 digit account number is composed of a Bellcore assigned 6 digit code which identifies AT&T as the card issuer, combined with a 4 digit code assigned by AT&T. In addition, the 4 digit PIN is assigned by AT&T. The card numbering format is not based on a telephone line number.

The "personal choice" card number consists of a variable account field (e.g., 7 to 9 alphanumeric characters) which may be designated by the Customer, and a PIN.

- (2) Calling Card other than the AT&T CIID/891 Card

Local Exchange Company Calling Card - a calling card issued by a Local Exchange Company that is accepted by AT&T for the billing of calls over its Network.

Commercial Credit/Charge Card - a credit/charge card issued by a non-carrier that is accepted by AT&T for the billing of calls over its Network.

3. Operator Dialed Calling Card Station

The specified party may be a person, or a station, department, extension or office through a PBX attendant.

After the called station has been reached, if the called party is unavailable and the calling party requests or agrees to speak to a party other than the party initially specified, the call is still billed as a Person-to-Person call. The calling party is responsible for identifying the party at the called station.

The Person-to-Person rates also apply when the calling party requests an AT&T operator to make arrangements with a called party to establish a call at a specified time or to arrange for messenger service.

- a. Operator Dialed Surcharge - A Surcharge applies to Person-to-Person calls as provided for in Section A5.3.1A.4.b.
6. Real Time Rated-Operator Station/Person-to-Person - A toll call for which the customer pays at the time the call is placed. Real Time Rated rates apply to the following calls:

- b. Calls for which the Company furnishes time and/or charges.
- c. Operator Dialed Surcharge - A Surcharge applies to Real Time Rated-Operator Station/Person-to-Person calls as provided for in Section A5.3.1A.4.b.
- d. Calls placed from a Customer Owned Coin Operated Telephone (COCOT) where AT&T provides operator coin supervision. In this case a bill will be issued monthly to the COCOT owner to collect the revenues owed to AT&T that was paid for by coin at the COCOT. This bill will include a 25% discount to the tariff rates to allow the COCOT owner to recover the administrative costs (including uncollectibles) incurred in collecting and remitting the revenue due to AT&T.

B. Rates and Charges

Charges for each MTS message between any two points within the state are determined as follows:

Rates are quoted in terms of initial and additional periods.

The initial period for all classes of service is one minute, except for Operator Station-Sent Paid Coin and Person-to-Person-Sent Paid Coin where the initial period is three (3) minutes.

Additional period rates given in the tables in A5.3.1B following are for each additional minute or any fraction thereof that the telephone connection continues beyond the initial period, except Operator Station Sent Paid Coin and Person-to-Person Sent Paid Coin where the additional period is three minutes.

First period and additional period rates for all messages by class of service are specified in the following Rate Tables.

For any Customer Dialed Calling Card Station or Operator Dialed Calling Card Station billed to Consumer Calling Cards, Operator Station, Person-to-Person or Real Time Rated Operator Station/Person-to-Person calls, the Service Charge specified in A5.3.1B.8. following is added to the Rate Table charge. This charge is in addition to initial period and additional period charges applicable to a call.

The following tables contain the initial period and additional period rates for the Day, Evening, and Night/Weekend rate periods for all call classes. These rates are based on chargeable time (duration) of the message, as specified in Section A5.3.1C., and the airline as specified in Section A5.5.

1. Initial Period rates given in the rate schedules in B. preceding are for connections of one minute or any fraction thereof, except for Operator Station-Sent Paid Coin and Person-to-Person-Sent Paid Coin where the initial period is three (3) minutes or any fraction thereof. All additional period rates given in the rate schedules in B. preceding are for each additional minute or any fraction thereof that the connection continues beyond the initial period, except for Operator Station-Sent Paid Coin and Person-to-Person-Sent Paid Coin where the additional period rates given in the rate schedules in B. preceding are for each three (3) minutes or any fraction thereof that the connection continues beyond the initial period.

6. Chargeable time does not include time lost because of faults or defects in the service.

D. Reversal of Charges (Collect Calls)

1. Collect calls are permissible for all telephone calls provided the charges are accepted at the called station. A5. MESSAGE TELECOMMUNICATIONS SERVICE

A5.5 Airline Mileage Between Rate Centers

A5.5.1 General

- A. For the purpose of determining airline mileages vertical and horizontal grid lines have been established across the state of Kentucky. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in airline miles. A vertical (V) and a horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. These rate centers and their V and H coordinates are shown in A5.5.3 following. A pair of V-H coordinates locates a rate center, for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained in A5.5.2 following.
- B. For message telecommunications service the rate center for a point not listed in this section is the rate center for the central office to which the point is assigned for telecommunications rate purposes; where the point is not assigned to a central office, the rate center is the location of the point.

A5.5.2 Determination of Airline Mileages

- A. To determine the rate distance between any two rate centers, proceed as follows:
1. Obtain the "V" and "H" coordinates for each rate center.
 2. Obtain the difference between "V" coordinates of the two rate centers. Obtain the difference between "H" coordinates.
- Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.
3. Divide each of the differences obtained in 2. by three, rounding each quotient to the nearer integer.
 4. Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in 3. by three and repeat step 4. Repeat this process until the sum of the squares obtained in 4. is less than 1778.

A5.5 Airline Mileage Between Rate Centers (Cont'd)

A5.5.2 Determination of Airline Mileages (Cont'd)

A. (Cont'd)

5. The number of successive divisions by three in steps 3. and 4. determines the value of "N." Multiply the final sum of the two squares obtained in step 4. by the multiplier specified in the following table for the value "N" preceding.

<u>N</u>	<u>Multiplier</u>	<u>Minimum Rate Mileage</u>
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361
5	5,904.9	1,081
6	53,144.9	3,241

6. Obtain square root of product in 5. and with any resulting fraction, round up to next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in 5. preceding, the minimum rate mileage corresponding to the "N" value is applicable.

A5. MESSAGE TELECOMMUNICATIONS SERVICE

A5.5 Airline Mileage Between Rate Centers (Cont'd)

A5.5.2 Determination of Air-Line Mileages (Cont'd)

A. (Cont'd)

Example:

The message rate distance is required between Bowling Green and Louisville.

- | | V | H |
|------------------|-------------|-------------|
| 1. Bowling Green | 6822 | 2745 |
| Louisville | <u>6529</u> | <u>2772</u> |
| 2. Difference | 293 | 27 |
3. Dividing each difference by three and rounding to nearer integer = 98 and 9.
4. Squaring integers and adding, $98 \times 98 = 9,604$
 $9 \times 9 = \underline{81}$
Sum of squared integers 9,685
Sum of squared integers is greater than 1777 so divide integers in (3) by three and repeat (4).
5. Dividing integers in (3) by three and rounding = 33 and 3.
6. Squaring integers and adding $33 \times 33 = 1,089$
 $3 \times 3 = \underline{9}$
Sum of squared integers 1,098
- This sum of squared integers is less than 1778 and was obtained after two successive divisions by three; therefore "N" = 2.
7. Multiply final sum of squared integers by factor 1,089
8.1 (corresponding to "N" = 2). $\times \underline{8.1}$
8,821.0
8. Square root of 6,642.0 = 81 and a fraction, which is rounded up to 94 miles (fractional miles being considered full miles). The 94 miles is larger than the minimum of 41 rate miles applicable when "N" = 2, so the message rate mileage is 94 miles.
